## EDUCATION

**The Pennsylvania State University** **University Park, PA**
*College of Engineering* *Graduation Month: December 2026*
*Bachelor of Computer Science (Engineering)*

## EXPERIENCE

**Penn State Eberly College of Science** **University Park, PA**
*Mathematics Grader* *August 2025 - Present*

- Graded undergraduate calculus assignments and assisted students with problem solving for exam preparation.

**Republic of Korea Air Force** **Jinju, South Korea**
*Aircraft Hydraulic and Electric System Engineer* *September 2022 - June 2024*

- Led a squad of 20+ personnel as squad leader, coordinating operations and maintaining readiness.

## COMPUTER SCIENCE PROJECTS

**AVT Capstone (Autonomous Vehicle Team, SAE Autodrive II)** **State College, PA**
*Guidance, Navigation, and Controls Division* *January 2026 - Present*

- Enhanced CI/CD pipeline in Mathworks Simulation subdepartment; implemented GitLab-triggered Simulink automation for model validation and regression testing.
- Developed obstacle-aware lane change decision logic leveraging HD maps (PostGIS, ROS2) for autonomous vehicle decision-making.

**AI Drone Control System – People Link One (PLO)** **State College, PA**
*Software Engineering Team* *January 2026 – Present*

- Built a real-time drone control pipeline integrating Raspberry Pi, camera, GPU-based AI inference, and Pixhawk flight control for autonomous command execution.

**UniGuide AI – People Link One (PLO)** **State College, PA**
*AI/ML Engineering Team Lead* *January 2025 - December 2025*

- Fine-tuned Phi-3 3.8B with PyTorch + Hugging Face Transformers using LoRA on CUDA for domain Q&A.
- Built training data pipeline: crawled 57k pages, generated 200k Q&A via local LLM, curated to 90k high-quality dataset.
- Deployed FastAPI inference service on AWS EC2; collaborated with team on retrieval/RAG integration.

**TAGO Airport Shuttle – CUCO LLC** **State College, PA**
*Co-Founder & Development Team* *September 2024 - Present*

- Co-founded campus ride-sharing platform connecting Penn State students with partnered taxi services.
- Built and deployed cross-platform mobile app (Flutter, Firebase); led backend development and App Store release.
- Implemented iOS features including push notifications, authentication, and in-app purchases.
- Formed cross-functional team; onboarded ~50 early users and initiated exclusive partnership discussions with local taxi companies.
