EDUCATION

The Pennsylvania State University **University Park, PA**
College of Engineering *Graduation Month: December 2026*
Bachelor of Computer Science (Engineering)

EXPERIENCE

Penn State Eberly College of Science **University Park, PA**
Mathematics Grader *August 2025 - Present*

- Graded undergraduate calculus assignments and assisted students with problem solving for exam preparation.

Republic of Korea Air Force **Jinju, South Korea**
Aircraft Hydraulic and Electric System Engineer *September 2022 - June 2024*

- Led a squad of 20+ personnel as squad leader, coordinating operations and maintaining readiness.

COMPUTER SCIENCE PROJECTS

AVT Capstone (Autonomous Vehicle Team, SAE Autodrive II) **State College, PA**
Guidance, Navigation, and Controls Division *January 2026 - Present*

- Enhanced CI/CD pipeline in Mathworks Simulation subdepartment; implemented GitLab-triggered Simulink automation for model validation and regression testing.
- Developed obstacle-aware lane change decision logic leveraging HD maps (PostGIS, ROS2) for autonomous vehicle decision-making.

AI Drone Control System – People Link One (PLO) **State College, PA**
Software Engineering Team *January 2026 – Present*

- Built a real-time drone control pipeline integrating Raspberry Pi, camera, GPU-based AI inference, and Pixhawk flight control for autonomous command execution.
- Implemented image capture and transmission pipeline enabling periodic data flow to GPU.

UniGuide AI – People Link One (PLO) **State College, PA**
AI/ML Engineering Team Lead *January 2025 - December 2025*

- Fine-tuned Phi-3 3.8B using PyTorch, Hugging Face Transformers, and BitsAndBytes with QLoRA on CUDA GPUs; built local inference/chat loaders and a reproducible checkpoint-based training workflow.
- Built an end-to-end training data pipeline: crawled 57K university pages, generated 200K Q&A pairs with a local LLM, and curated a 90K high-quality instruction dataset.

TAGO Airport Shuttle – CUCO LLC **State College, PA**
Co-Founder & Development Team *September 2024 - Present*

- Co-founded campus ride-sharing platform connecting Penn State students with partnered taxi services.
- Built and deployed cross-platform mobile app (Flutter, Firebase); led backend development and App Store release.
- Implemented iOS features including push notifications, authentication, and in-app purchases.
- Formed cross-functional team; onboarded ~50 early users and initiated exclusive partnership discussions with local taxi companies.
